

Thx for your participation and thx for responding on the survey, it will help us to improve on the future conferences.

Some response/ feedback based on the survey done after the conference in Stenungsund

Would you recommend this conference to others in the business

100% would recommend the conference

The intention by the organizing committee was to focus on the “polymer engineering” part of our business. We always try to dilute with some other topics to broaden the program so that everyone should find some interesting parts. Was the program relevant for your job?

93% Think that the conference is relevant

Comments

Presentation regarding coating and requirement was the most relevant for me.

Not directly relevant but of general interest certainly

As always, some presentations were more relevant than others, but there were a good range of topics.

Relevant to a certain degree.

Not really, but still interesting, and I enjoyed the program

Was the location and hotel according to expectation?

100% liked the hotel and location

Annelie Pompe We had for the first time in many years an external seminar. The idea was that she could give us some inspiration and challenge us to think in new directions. Did you appreciate this seminar?

Svarade: 44 Hoppade över: 0

Comments from the organizing committee

Several of the participants gave her 100 = the best they have ever heard and some gave her rather low score. The average is still very high with 85.

We will continue to look for interesting seminars that can challenge our everyday thinking.

Dinner ex. food The band that played for us in the evening was RM Duo

Comments from the organizing committee

Average around 4 is probably ok. It is difficult to find something that will be loved by everyone.

We received a lot of comments on this one, a summery:

- Too loud music during dinner*
- Poor service occasionally from the staff.*
- Some jokes from the band was not ok in English*
- ...it became too late*
- I enjoyed the whole evening*
- A great evening...*
- The quiz took too long*

Cost, value. Is the participation fee and hotel cost ok?

Comments from the organizing committee

We are a “non profit” organization. Fact is however that our bank account is growing each year which gives us the freedom to take some risks and try new things that can be beneficial for our members. The total cost of doing this arrangement is the region of 30000 Euro and our break even was around 80 participants.

We made it.

Our ambition is to keep the participation fee as low as we can but still give the highest quality to You.

Comments.

We received a lot of comments, very valuable. This is only a summary!

It was good to have a long notice period before the event.

Chairman/moderator should have some questions prepared to the lecturer, if there are no questions from the audience. Presentation of lecturer could also be more formal and give more info about the lecturer and set the presentation in a broader perspective.

Maybe it's a characteristic of the Swedish culture, but there were very few questions from the audience following the presentations. Perhaps a committee member could take the lead in asking the first question. This can be a good way of encouraging others to also ask questions.

Bra med lite luft i schemat, då det är lätt hänt att det blir förseningar. Denna gången låg vi lite före, vilket blev väldigt bra och kändes avslappnat.

I would like to see Swedish rubber parts manufacturers, oil producers, compounders to present as well, so that we could learn what challenges and new topics they would be interested in. Also, if possible, OEM presence would be appreciated as well, e.g. Volvo, Scania etc.

Tack för två intressanta och roliga dagar! Kul att så många medlemmar deltog med tanke på att det var exklusivt och endast konferensen som drog. Positivt då detta bidrog till en mer koncentrerad och homogen grupp till skillnad mot när konferensen ligger i anslutning till mässor eller stad. Programutskottet har gjort ett fantastiskt bra jobb!!!

Have the annual meeting at the first day and finish the conference with lunch

Testing the equipment (headphones, buzzer, etc) with the speakers prior to the speech. Keep a plan B speaker among the attendees prepared if any of the speakers cannot perform due to sickness or other reasons. Plan min 2hrs between last speech and the dinner. This for long distance travelers have a possibility to both take a power nap and have time to prepare before dinner.

Great dancing and nice with SPA

Great great great

Perhaps some variation in the entertainment? You can still book RM Duo they are great, but perhaps something other than a music quiz....

Thx to all again and see you next time
